## Hillside Project – Approval for Section 49 Development Applications

**Rex Minerals Limited (“Rex”) is pleased to announce today that approval has been granted for the road realignments and upgrades to the Ardrossan Jetty and Ship Loader that form part of the Hillside Copper Project Development.**

Rex now awaits final state regulatory approval for the Mining Lease of the Hillside project.

Rex’s Managing Director, Mr Mark Parry said today, “The Section 49 approvals are one of several important steps that will enable Rex to fulfil its aim of developing the Hillside Copper project. The Government and the Regulator have carried out a very detailed and rigorous assessment process inclusive of public review and comment and have required significant independent reviews to ensure that the developments meet their strict requirements and guidelines.

The proposed upgrade to the jetty and ship loader will incorporate the highest level of environmental controls, inclusive of fully enclosed conveyors and dust and spill controls that meet regulatory and community expectations. We have also designed the upgrade to ensure that the ship loader remains capable and compliant with current environmental conditions associated with this multi user port.”

Mr Parry said, “Rex has laid out a process and plan that wherever possible ensures that road realignments are carried out early in the construction phase to minimise any impact or disruption to the community. In conjunction with the Department of Planning Transport and Infrastructure (DPTI – Roads) we have also sought to address a number of potential accident zones through improving the current alignment and configuration of key intersections.”
